## **DECLARATION BY THE MANUFACTURER**

### **Product Description:**

Insulated Water Troughs, ID25 (1 Ball), ID80 (2 Ball) & ID100 (2 Ball) for farm animals

I, the undersigned declare that the component described above has been manufactured to the standards required.

### **Application:**

The Insulated Water Troughs for cattle are automatic drinkers that are insulated to prevent the water of the animal from freezing at low temperatures with a minimum head of stock.

### **Specification:**

Rotationally Moulded Polyethylene Water Trough & Lid which is filled with polyurethane insulating foam. Each model is fitted with a 'BV3/8' Brass Water Valve for automatic water filling of the trough.

Insulated Water Troughs – Commodity Code: 39269097

Water Valves – Commodity Code: 84818019

### **Harmonized Standards Applied:**

Directive 2001/95/WE, Committee Decision dated 12.12.2003 Safety of products – Basic concepts.
